DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on Oct. 24, 2005 has been entered.

Applicant's arguments filed on Oct. 24, 2005 have been fully considered.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 5, 6, and 8-10 are are rejected under 35 U.S.C. 102(b) as being anticipated by Taniguro et al. (Taniguro) (6,293,670).

Taniguro discloses an image forming apparatus and a paper feeding apparatus, comprising holding means for holding plurality of paper (Fig. 2), separation means (26 and 27, col. 5, lines 35-44) for separating a single recording medium, movement means (Fig. 8), and guide member for guiding a lower surface of the moving recording medium along a predetermined conveyance path, the guide means being a plate-like member and having predetermined region (34) not in contact with the paper and a remaining region (34a) in contact with the paper. Taniguro also discloses the predetermined regions includes recesses (34) and

Art Unit: 2851

where the predetermined region include regions which correspond to a corner part of the recording medium (Fig. 8).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 7 is rejected under 35 U.S.C. 103(a) as being unpatentable over Taniguro et al. (Taniguro) in view of Takagi (JP 1-75050).

Taniguro discloses the claimed invention as discussed above; however, Taniguro does not disclose the notches in the predetermined region. Takagi discloses notches in the guide means. Therefore, it would have been obvious to one of ordinary skill in the art at the time of the invention to provide the notches of Takagi instead of recess of Taniguro in order to prevent deformation of paper.

Allowable Subject Matter

Claims 1-4 are allowed.

Response to Arguments

Applicant's arguments with respect to claims 5-10 have been considered but are moot in view of the new ground(s) of rejection.
